# INTRODUCTION

TO US, ROLEPLAYING IS ALL ABOUT ESCAPISM. BUT it isn't just an escape to anywhere; it's an escape to a magical realm where anything is possible, where we tell stories with friends, where we go on a journey of not just discovery, but sometimes self-discovery. It's a way to play a socially challenged brute, a priestess who robs the local noble in the thick of night, or a young boy meddling with dark powers he doesn't quite understand. It's about collective experiences, and most importantly, it's about having fun. Together.

But campaigns inevitably end. The party is level 20 and the DM is all out of ideas. There is nothing more to do so Thokk the barbarian and Odeon the warlock stop existing. Of course, that might result in the birth of Thynaedeus the monk and completely new adventures, which is part of the awesomeness to begin with!

However, sometimes you just fall in love with your character and you want to continue following them on their journey. You want to continue escaping the dreariness and responsibilities of everyday life as that character. It is in cases such as this that I hope, that this book may help you out.

## BALANCING "EPIC"

Trying to balance all the classes, each with a multitude of subclasses, is by no means an easy task. There is, however, some wiggle room, as classes past 20th level are intended to be quasi demigods - maybe even capable of challenging the gods themselves.

That being said, feedback from the community has proven to be paramount when balancing epic levels. We thank you all for your continued support. Epic Classes will continue to be revised so long as there is an interest in it.

## BEYOND 20TH LEVEL

In the core rules it is suggested, that once you reach 20th level, you can obtain epic boons whenever you've amassed 30.000 XP (see chapter 7 in the *Dungeon Master's Guide*). That makes sense, where the power gain from boons is marginal when compared to the power contained within this handbook. You are free to go with that progression, but I'd suggest 50.000 XP would be more fitting, as 30.000 is done rather fast with the epic features.

Of course, you could also go with milestones, or a completely different style of level progression. That is, as always, completely up to you. However, for the sake of completion, I will present a flow for character advancement here, expanding on the progression suggested in the *Player's Handbook*.

## TIERS OF PLAY

The first epic levels (21st to 22nd level) you are still considered to be fourth tier of play.

In the fifth tier of play (23rd to 26th level), characters have reached a level of power, that few mortals can match, and the gods themselves begin to take notice.

The sixth and final tier (27th to 30th level and beyond), is where you've reached godlike heights. You are near unstoppable and have a fighting chance against righteous gods and antediluvian evils alike. You take part in cosmic struggles and discover the most ancient and well hidden secrets of existence.

## PROFICIENCY

The proficiency bonus does not increase at epic levels.

### CHARACTER ADVANCEMENT

Experience Points	Level	Proficiency Bonus
410,000	21	+6
470,000	22	+6
540,000	23	+6
620,000	24	+6
710,000	25	+6
810,000	26	+6
950,000	27	+6
1,200,000	28	+6
1,500,000	29	+6
1,800,000	30	+6

## MULTICLASSING

Multiclassing functions exactly the same beyond 20th character level as it does before.

## SPELLCASTING

As described in the *Player's Handbook*, you determine your available spell slots by adding together all your levels in the in full caster classes, half your levels (rounded down) in half caster classes, and a third of your levels (rounded down) in spellcasting archetypes from martial classes (like the Eldritch Knight subclass for the fighter or the Arcane Trickster subclass for the rogue). Use this total to determine your spell slots by consulting the Multiclass Spellcaster table below.

For example, if a character is a 25th level paladin and a 5th level sorcerer, it would be a 17th level spellcaster. Any additional spell slots gained from epic paladin levels are added on top of that.

## MYTHIC PROGRESSION

If you reach 30th level and wish to continue playing, mythic progression has got you covered. The various boons, maneuvers, and spells available here are intended to be god-like in power, allowing characters to gradually surpass even the mightiest of deities.

## CHANGES TO THE GAME

In order to have fun and not break the game, some elements can be changed, while others should be changed. This is because the base game was designed with level 20 as the cap, eliminating the need to think beyond 20th level.

Below you'll find restrictions as well as a new optional rule supported by all our future publications.

### CANTRIPS

Many cantrips continue to increase in potency as characters progress past 20th level. If a cantrip has a uniform progression at 5th level, 11th level, and 17th level, it continues that progression at 23rd level and 28th level.

For example, the *eldritch blast* cantrip gains an additional beam at 23rd level for a total of five beams, and again at 28th level for a total of six beams.

Similarly, the *vicious mockery* cantrip increases by 1d4 damage at 23rd level for a total of 5d4 damage, and again at 28th level for a total of 6d4 damage.

If a cantrip progresses through various die types, such as from a d4 to a d6, it can also progress at 23rd and 28th level, though it can't increase in power beyond a single d12.

### RESTRICTIONS PAST 20TH LEVEL

We highly suggest you adhere to these restrictions in your game.

**Challenge Rating Limitations.** Regardless of what spells or class features a Player Character has access to, it can't conjure, control, or create creatures with a CR above 20, nor can a Player Character transform into such a creature. The only exception are specific effects, such as the Nightmare Lord mythic spell.

In addition, while within a deity's divine realm, a creature can't conjure forth other creatures with a CR higher than half its own CR or level, unless the deity allows it.

**Divine Intervention.** The cleric's Divine Intervention feature is blocked from reaching the target deity within a

divine realm, unless the realm belongs to the deity that is being targeted. The Divine Intervention feature also can't be used offensively against a deity.

In addition, consider limiting the Divine Intervention feature to effects that mimic spells up to 9th level with the exception of the *wish* spell, when combating monsters of challenge rating 30 and higher.

**Magical Communication.** While in a divine realm, spells and effects that allow contact with beings from other planes don't function unless the realm's deity allows it. In addition, a deity can sense when someone in its domain is casting such a spell or using such an effect and can choose to make itself the spell's or effect's recipient, so that it becomes the one who is contacted.

## OPTIONAL RULE: EPIC DIE

If you want your combat to feel truly epic, consider including the Epic Die. It is designed to make combat more dynamic and represents increasing adrenaline, allowing Player Characters to increase in power the longer they stay in combat, while monsters gain new and unique abilities to still remain an epic threat.

### SETUP

When initiative is rolled, a d6 is placed visibly for all and set to 1. This is the Epic Die. Whenever the creature with the lowest initiative has finished its turn, the Epic Die is increased by 1. If the Epic Die reaches 6, it cannot increase further.

### MONSTERS AND THE EPIC DIE

Some monsters also receive bonuses based on the Epic Die, as shown in the "Variant: Epic Die Traits" sidebar for a monster. This is generally the case for monsters of CR 20 and higher.

Here is an example of a monster using the Epic Die, taking from *Ulaunt's Guide to the Planes: The Shadowfell*.

#### OPTIONAL: EPIC DIE TRAITS

If your group plays with the Epic Die, a nekurat also has the additional trait noted below:

**Epic Trait: Unholy Speed.** While in nekurat form, the nekurat's AC increases by an amount equal to half the Epic Die, and its walking, climbing, and flying speed increases by a number of feet equal to 10 x the Epic Die.

### PLAYER CHARACTERS AND THE EPIC DIE

Below are the bonuses that players receive based on the Epic Die. When a Player Character receives a bonus from the Epic Die, it keeps that bonus until it gets a higher bonus that affects the same gameplay element. For example, if the Epic Die was on 3, giving PCs a +1 bonus to saving throws and skill checks, a PC would also retain the bonus from when the Epic Die was 2.

1. No bonus
2. +1 to attack rolls, damage rolls, and save DCs
3. +1 to saving throws and skill checks
4. +2 to attack rolls, damage rolls, and save DCs
5. +2 to saving throws and skill checks
6. +3 to attack rolls, damage rolls, save DCs, saving throws, and skill checks

### REMOVING THE EPIC DIE

When a combat is concluded, the Epic Die is decreased by 1 every 30 seconds. After 3 minutes, the Epic Die is removed from play. If initiative is rolled again before the Epic Die is removed, treat its current number as its starting number.

## FIGHTING EPIC MONSTERS

While using this book allows you to delve into epic levels, the final ingredient for true epic level play is not found within these pages, that ingredient being epic monsters.

**Epic Monsters.** To include epic monsters in your adventures, purchase *Ulraunt's Guide to the Planes*. Each volume focuses on a particular plane of existence, such as The Shadowfell, Acheron, or Hades. Each title in the series includes a multitude of locations and character options that fit the theme of the plane such as races, archetypes, and spells. Each volume also includes many new monsters with challenge ratings going beyond 40. Each plane also has deity's or godlike creatures inhabiting it which are all presented within a volume, complete with original artwork, statblocks, and lair actions.

**The Keeper of Tomes.** Ulraunt is the fictional author of each volume. He is the Keeper of Tomes at Candlekeep; an enormous and exclusive library on the Sword Coast within the Forgotten Realms.

Ulraunt penned the descriptions of the various locations, deities, and monsters himself, based on the adventures he has had throughout his life.

**Creating Epic Combat Encounters.** As detailed in chapter 3 of the *Dungeon Master's Guide*, you can create combat encounters based on XP thresholds and gauge how much experience a PC is expected to earn during a standard adventuring day. Use the XP Thresholds by Epic Character Level and Adventuring Day XP tables to supplement those rules when creating combat encounters for epic characters.

### XP THRESHOLDS BY EPIC CHARACTER LEVEL

Character Level	- Encounter Difficulty -			
	Easy	Medium	Hard	Deadly
21	4,000	7,500	11,000	15,000
22	4,500	8,500	12,500	16,500

23	60,000	28	125,000

25	73,000	30	200,000

## DESIGNING THE CLASSES

In case you wish to hear a few words about the design philosophy about each class, this chapter is for you. We will try to provide insight into why each class ended up the way it did. In order to get the full picture, however, we will sort the classes into a few groups.

In order to balance the classes, and make sure the power curve is at least reasonably close, we designed a uniform progression system that the classes adhere to. Here's a short look into the planning behind it all.

### VARIANT: SPELL POINTS WITH EPIC SPELL CAPACITY

If you play with the Spell Points variant rule, use the following information to replace the Epic Spell Capacity feature:

#### 22ND LEVEL

**Spell Points.** Your spell point maximum increases to 152.

#### 26TH LEVEL

**Spell Points.** Your spell point maximum increases to 176.

**Spellcasting Improvement.** You can cast spells of 6th and 7th level twice between long rests.

#### 29TH LEVEL

**Spell Points.** Your spell point maximum increases to 228.

**Max Spell Level.** You can cast spells at 10th, 11th, and 12th level.

**10th Level Cost.** It costs 15 spell points to cast a 10th level spell.

**11th Level Cost.** It costs 17 spell points to cast a 11th level spell.

**12th Level Cost.** It costs 20 spell points to cast a 12th level spell.

Note that a character can only gain the benefits noted above when it would get the Epic Spell Capacity feature which is based on class advancement rather than character advancement.

## ALL CLASSES

### PROGRESSION

**Level 21.** Ability Score Improvement.

**Level 25.** Ability Score Improvement.

**Level 29.** Ability Score Improvement.

## MARTIAL CLASSES AND HALF-CASTERS

### MARTIAL CLASSES

Barbarian, Blood Hunter, Fighter, Monk, Rogue

### HALF-CASTERS

Artificer, Paladin, Ranger

### PROGRESSION

**Level 21.** Minor utility or non-combat ability boost.

**Level 22.** Unique minor class ability for martial classes and Extended Spell Capacity for half-casters.

**Level 23.** Central class ability boost.

**Level 24.** Unique survivability boost, possibly combined with some offense. Versatile utility for the artificer.

**Level 25.** Minor utility or non-combat ability boost.

**Level 26.** Unique major class feature (often big improvement on level 24 ability) for martial classes and Extended Spell Capacity for half-casters.

**Level 27.** Archetype feature (power varies somewhat depending on base class power).

**Level 28.** Central class ability boost for the artificer, monk, and rogue, and Extra Attack for all other classes.

**Level 29.** Major combat boost or central class ability boost.

**Level 30.** Capstone and Death Save Advantage.

Death Save Advantage is given to all martial classes. It doesn't do a lot at these high levels, and as such it is mostly a ribbon feature, but it tries to highlight the superior physique of the martial classes.

## ARCHETYPE-FOCUSED FULL CASTERS

### CLASSES

Cleric, Sorcerer, Wizard

### NOTES

The cleric, sorcerer and wizard have one thing in common besides being full spell casters: the core class doesn't actually get that much. In large part most of their features come from the chosen archetype. That effectively means, that there isn't a lot to build on in the core class. It also means that two clerics can be very different. In order to continue this design for epic levels, we chose for the archetype focused full casters to gain archetype features at three different levels: 21st, 25th, and 28th, instead of just at the 27th level like other full casters.

That being said, they are full casters, and as such they get Epic Spell Capacity at 22nd, 26th and 29th level.

### PROGRESSION

**Level 21.** Archetype feature.

**Level 22.** Epic Spell Capacity.

**Level 23.** Central class ability boost.

**Level 24.** Unique minor ability.

**Level 25.** Archetype feature.

**Level 26.** Epic Spell Capacity.

**Level 27.** Major combat boost.

**Level 28.** Archetype feature.

**Level 29.** Epic Spell Capacity.

**Level 30.** Capstone.

## CLASS-FOCUSED FULL CASTERS

### CLASSES

Bard, Druid

### NOTES

Having just explained the decisions behind giving some of the caster classes archetype features at three levels, you might wonder here why the bard gets one archetype feature, and the druid gets two. Well, the bard isn't very dependent on the archetypes, as he gets a lot of stuff from his core class. The druid, however, is somewhere in the middle, and we wanted to accommodate that.

### PROGRESSION

**Level 21.** Minor non-combat ability boost.

**Level 22.** Epic Spell Capacity.

**Level 23.** Central class ability boost for bard, archetype feature for druid.

**Level 24.** Unique survivability or utility boost, possibly combined with a little offense.

**Level 25.** Minor non-combat ability boost for the druid, unique, hard-to-quantify boost for the bard.

**Level 26.** Epic Spell Capacity.

**Level 27.** Archetype feature.

**Level 28.** Central class ability boost.

**Level 29.** Epic Spell Capacity.

**Level 30.** Capstone.

## THE WARLOCK

See the class for its progression. With pact boons, patrons, eldritch invocations, and spells, the warlock is an exceptionally customizable class.

## DESIGN PHILOSOPHY

Here we would like to provide a few key words on each class individually. These keywords were our anchor during the design phase.

**Artificer.** Versatile utility, master of magic items.

**Barbarian.** Hard to kill, big criticals, punishes attackers.

**Bard.** Superb at many things, support.

**Blood Hunter.** Damage, risk/reward. While it would normally never be feasible to do so, the Blood Hunter's Crimson Rite damage die eventually becomes a d20. This is a reflection of the risk/reward gameplay that defines the class.

**Cleric.** Archetype dependent, focus on channel divinity.

**Druid.** Versatile with spells and wild shape.

**Fighter.** Damage, survivability, tactics.

**Monk.** Battlefield control, survivability, utility.

**Paladin.** Damage, survivability, support.

**Ranger.** Focus on favored enemies, polish archetypes.

**Rogue.** Damage, survivability, trickery, utility.

**Sorcerer.** Archetype dependent, breaking the rules, high damage potential, unruly.

**Warlock.** Customizability, a little of everything.

**Wizard.** Archetype dependent, master of spells.

### EPIC SPELL CAPACITY

Full casters all gain access to the Epic Spell Capacity feature. At 29th level, the feature grants access to 10th, 11th, and 12th level spell slots. These spell slots can be used to cast any spell. If you, for example, were to cast *fireball* using a 12th level spell slot, it would deal 17d6 fire damage.

# PART 1: EPIC PROGRESSION

HIS CHAPTER PROVIDES MEANINGFUL PROGRESSION past 20th level for 14 classes and a total of 94 subclasses, allowing your character to become truly epic. This chapter expands on the options first presented in various sources beyond simply the core books, such as Volo's Guide to Monsters, Xanathar's Guide to Ev-

everything, and many more.

21ST-, 25TH-, AND 29TH-LEVEL EPIC ARTIFICER FEATURE

When you reach 21st level, and again at 25th and 29th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. Contrary to earlier levels, you can now improve your ability scores up to 24 using this feature.

### MAGIC ITEM GURU

21ST-LEVEL EPIC ARTIFICER FEATURE

Your skill with magic items reaches new heights:

- You can attune to up to seven magic items at once.
- Using an action, you can restore a number of charges to a magic item as if that item were to regain its charges naturally. Once you use this feature, you can't use it again until you finish a long rest.

### EXTENDED SPELL CAPACITY

22ND- AND 26TH-LEVEL EPIC ARTIFICER FEATURE

Beginning at 22nd level, you gain an additional 5th level spell slot. At 26th level you gain a 6th and 7th level spell slot and you gain access to additional spells as shown in the Artificer Expanded Spell List sidebar below.

### PLIABLE TALENT

22ND-LEVEL EPIC ARTIFICER FEATURE

You gain the following features.

**Adept Tinkering.** You can use your Magical Tinkering feature on Huge or smaller objects.

**On-Demand Tools.** You can produce exactly the tool you need, exactly when you need it: using an action with tinker's tools in hand, you can magically create one set of artisan's tools in an unoccupied space within 5 feet of you. Though the product of magic, the tools are nonmagical, and they vanish when you use this feature again.

**Tool Adroitness.** You can add half your proficiency bonus, rounded down, to any ability check you make with a tool that doesn't already include your proficiency bonus.

### ARTIFICER EXPANDED SPELL LIST

#### 6th Level

Contingency (evocation)  
Forbiddance (abjuration)

#### 7th Level

Sequester (transmutation)  
Teleport (conjunction)

## SPELL-STORING ITEM

23RD- AND 29TH-LEVEL EPIC ARTIFICER FEATURE

You can choose 3rd- or 4th-level spells with your Spell-Storing Item feature. Upon reaching 29th level, you can also choose 5th-level spells.

Spells of 3rd level or higher require concentration for their duration when a creature takes an action to produce the spell's effect from an item.

## TOOL VIRTUOSITY

23RD-LEVEL EPIC ARTIFICER FEATURE

Your proficiency bonus is applied three times for any ability check you make that uses your proficiency with a tool.

## ARTIFICE TRINKET

24TH-LEVEL EPIC ARTIFICER FEATURE

You learn to craft a special trinket. The trinket can be a ring, a necklace, an earring, a bracelet, a belt buckle, a brooch, or another Tiny object in whatever shape you choose. Crafting a trinket requires you to have a regular version of the object you wish the trinket to resemble, thieves' tools, and copper wiring worth at least 5 gp which is consumed in the crafting. Crafting the trinket takes an hour and can be done during a short or long rest.

You can craft up to three trinkets. If you exceed the maximum by crafting a fourth trinket, the oldest trinket loses its magic. An artifice trinket is magical only for you.

When you craft a trinket, choose one of the following types:

**Trinket of Flawless Tracking.** While wearing or holding this trinket, you can use an action to make a ranged spell attack against a target within range. A creature must succeed on a Wisdom (Perception) check against your artificer spell save DC to discern that you are making the attack. On a hit, a tracker shoots from the trinket and sticks to the target for 1 hour before falling off. The tracker is a minuscule piece of copper inside a tiny droplet of sticky liquid.

While you are wearing or holding the trinket, you sense the direction to the tracker's location, as long as the tracker is within 1,000 feet of you. If the tracker is moving, you know the direction of its movement.

The trinket holds up to three trackers at a time and can have up to three trackers active at a time. When a tracker falls off its target it ceases to function. You can spend 10 minutes using your thieves' tools and expending 1 gp worth of copper during a short or long rest to craft up to three new trackers and load them into the trinket.

**Trinket of Limited Storage.** While wearing or holding this trinket, you can use an action to touch it against an object that isn't being worn or carried. If the object weighs no more than 6 lbs. it disappears, as it is magically miniaturized and transported inside the trinket. While wearing or holding the trinket, you can use an action to magically pull forth the stored object again.

The trinket can hold one object and any attempt to store an object in the ring while it already contains an object fails.

**Trinket of Near-Lifelike Projection.** While wearing or holding this trinket, you can magically create the effect of a *silent image* spell without expending a spell slot or material components. When duplicated in this way, the effect ends early if you and the illusion are further than 60 feet apart or if you can no longer see the illusion.

## MAGIC ITEM MAESTRO

25TH-LEVEL EPIC ARTIFICER FEATURE

Your skill with magic items reaches new heights:

- You can attune to up to eight magic items at once.
- If a magic item on your person would lose its magic and become a mundane item due to a condition being met as detailed in the item's description, you can use your reaction to temporarily create a magical field around the item to prevent the item's magic from leaving it. This does not protect against external effects, such as an antimagic field spell, from turning your magic items into mundane items.

## ARTIFICER SPECIALIST FEATURE

27TH-LEVEL EPIC ARTIFICER FEATURE

You gain a feature from your artificer specialization, detailed at the end of the class description or one from another source.

## INFUSION MASTERY

28TH-LEVEL EPIC ARTIFICER FEATURE

Your impeccable skill and methodology is the stuff of legend. Each of your items can be infused by up to two different infusions. In addition, every other time you use your Replicate Magic Item infusion to replicate a magic item, the infusion doesn't count towards your number of infused items.

## GRAND ARTIFICER

30TH-LEVEL EPIC ARTIFICER FEATURE

Your magic is strong enough to alter the magic already in place within an item. You can use your Infuse Item feature on magic items but a magic item can only be affected by one of your infusions.

## TOOL MASTERY

30TH-LEVEL EPIC ARTIFICER FEATURE

You gain proficiency with all tools.

EBERRON: RISING FROM THE LAST WAR

### UPGRADE PARADIGM

In addition, you've learned to equip your eldritch cannon with a scintillation regulator, doubling the range, as well as damage dice and dice used to grant temporary hit points by your Flamethrower, Force Ballista, and Defender options.

## BATTLE SMITH

EBERRON: RISING FROM THE LAST WAR

### RECONSTRUCTION PARADIGM

27TH-LEVEL EPIC BATTLE SMITH FEATURE

As a steel juggernaut, the steel defender's size changes to Large, its AC increases by 2, it grants half cover to you while you remain within 5 feet of it, and its movement speed is reduced to 30 feet. When the defender transforms into a juggernaut, it gains temporary hit points equal to your artificer level. These temporary hit points last until the juggernaut transforms back into a defender.

In addition, when you target your steel defender or steel juggernaut with the mending cantrip, it regains 6d6 hit points, and you can use your Arcane Jolt feature any number of times, but you still can do so no more than once on a turn.

## ABILITY SCORE IMPROVEMENT

### 21ST-, 25TH-, AND 29TH-LEVEL EPIC BARBARIAN FEATURE

You strike with irresistible ferocity, smashing through the enemies defenses like no other and even decimating magic. Once on each of your turns when you hit a target with a weapon attack, you can cause the weapon to deal an additional die of damage. If you do so when you hit a creation of force on your turn, such as those created by the *forcecage* or *wall of force* spells, you create a 5-foot-diameter hole in the force until the end of turn.

**Savage.** Taking injuries while raging fuels the fire within you. While raging, whenever you are hit with a melee attack, you gain a number of Savagery Dice equal to the damage taken divided by 5. You can never have more than 3 Savagery Dice at any one time. Your stored Savagery Dice last until your rage ends, until you are healed, or after 1 minute.

When you hit a creature with a melee weapon attack, you can expend any number of Savagery Dice you have stored and add the dice to the attack's damage roll. The damage of your Savagery Dice equals your weapon damage die.

**Tribal.** Your very presence makes your allies more resilient. While raging, your allies within 5 feet of you are resistant to bludgeoning, piercing, and slashing damage.

**Undaunted.** You are near impossible to kill. If you drop to 0 hit points and don't die outright, you can make a DC 5 Constitution saving throw with advantage. If you succeed, you drop to 1 hit point instead, and your rage is automatically activated if it isn't already.

Each time you use this feature after the first, the DC increases by 5. When you finish a short or long rest, the DC resets to 5. This feature replaces your Relentless Rage feature.

## EPIC FLAVOR

### OPTIONAL EPIC BLOOD HUNTER FEATURE

Before starting an epic game, you might want to consider adding some epic flavor to your blood hunter, choosing from the options shown below.

### DIABOLICAL ALTERATION

Surviving the imbibing of Hunter's Bane, or perhaps balancing your existence so closely to the evil you wish to combat, has caused you to change in a diabolical way. A diabolical alteration can provide many roleplaying possibilities but might also cause NPCs to become more wary of you. Work with your DM to determine if a physical alteration is right for your blood hunter.

#### d6 Diabolical Alteration

- 1 You don't have a reflection.
- 2 Your voice is deep and growly like that of a large, wild animal, and you can howl with unnatural ferocity.
- 3 Your eyes have a slit-like pupils, like the eyes of a cat or snake.
- 4 Your blood is different from regular blood. It might be sticky and black like tar, a water-like golden substance, boiling hot blood, sand or dust, or something else entirely.
- 5 Your toes and feet lengthen and you walk on your toes, giving you a bestial digitigrade posture.  
Your skin is terrifyingly different. Your skin might be translucent, have extreme hair growth, be exceptionally pale, feel wet and rubbery to the touch, gleam with a subtle radiance, or something else entirely depending on your order and your personal nature.
- 6

### VIOLENT RITES

Contrary to most blood hunters, your crimson rites manifest not only on your weapon, but also on yourself or even the world around you. This reflects how your crimson rites have become second nature to you, as your power has grown.

#### d6 Violent Rite Effect

- 1 While you have a rite active, your eyes become infused with the effect of your active rite: swirling red flames for fire, motionless icy blue for cold, crackling yellow and white for lightning, vibrating eyes for thunder, lifeless gray for psychic, ventablack for necrotic, and sparkling white for radiant.
- 2 Lights within 30 feet of you flicker while you have an active rite.
- 3 While you have an active rite, your veins bulge and become visible beneath your skin, like a network of black tunnels.
- 4 While you have an active rite, you seemingly grow in size and bulk.
- 5 While you have an active rite, creatures within 30 feet of you get a sense of imminent doom.
- 6 While you have an active rite, the air around you seems to shift and shimmer unnaturally and nonmagical plants that aren't creatures wither and die when within 5 feet of you.

## ABILITY SCORE IMPROVEMENT

**Blood Curse of the Anxious.** All Wisdom saving throws the target makes before this curse ends have disadvantage.

**Blood Curse of Binding.** On a failed saving throw, the creature also drops prone.

**Blood Curse of Bloated Agony.** The cursed target takes 1d8 necrotic damage at the start of each of its turns and whenever it makes an attack or casts a spell.

**Blood Curse of Corrosion.** If the creature succeeds on its saving throw to end the curse, it must succeed another Constitution saving throw or become stunned until the end of its next turn as its body recovers.

**Blood Curse of the Exorcist.** The creature that charmed, frightened, or possessed the target of your curse becomes charmed by you if it had charmed the target, frightened by you if it had frightened the target, or takes an additional 7d6 psychic damage if it had possessed the target. If the creature becomes charmed or frightened by you, the effect lasts for 1 minute. At the end of each of its turns, the creature can make a Wisdom saving throw, ending the charmed or frightened effect on itself on a successful save.

**Blood Curse of Exposure.** The target instead loses invulnerability and resistance to the damage types of the triggering attack or spell until the end of the turn.

**Blood Curse of the Eyeless.** On a failed saving throw, the creature also becomes blinded until the end of its next turn.

**Blood Curse of the Fallen Puppet.** On a failed saving throw, the creature attacks with advantage and also adds half your blood hunter level to its damage roll.

**Blood Curse of the Howl.** Affected creatures have disadvantage on the saving throw.

**Blood Curse of the Marked.** Until the end of your turn, whenever you deal rite damage to the target, you roll two additional hemocraft die of rite damage instead of one.

**Blood Curse of the Muddled Mind.** Whenever the target succeeds on a Constitution saving throw made to maintain concentration on a spell, the target takes psychic damage equal to your Intelligence modifier. The target doesn't need to make a Constitution saving throw to maintain concentration due to this damage.

**Blood Curse of the Souleater.** As part of the same reaction you use to usher a soul to your patron, you can immediately expend the spell slot you regain to cast a spell with a casting time of 1 action.

- You ignore difficult terrain while moving the most direct route towards the affected creature.

#### d6 Divine Echo

- 1 When you use your Channel Divinity, your deity's holy symbol briefly manifests near you as radiant light, dark shadow, or some other visual phenomenon that reflects the nature of your deity.
- 2 Periodically when you speak, your deity's voice is audible but faint as it mirrors your words. As a result, at the whims of your deity your words can cause awe in those around you.
- 3 When you expend a cleric spell slot, millions of minuscule particles seem to hover in the air around you for a few seconds before they fade from view. The particles can be radiant light, wisps of shadow, luminescent green sparks, or some other visual phenomenon that reflects the nature of your deity.
- 4 Through your mere presence you can cause the world around you to seem more beautiful, magical, or horrible, depending on the nature of your deity. For example, colors could appear brighter or dulled down, or bird song could be heard clearly or not at all.
- 5 When you are victorious in battle, an audible phenomenon manifests in the world around you. The phenomenon can be a thunderous boom, a mischievous and ominous giggle, a mad laughter, an angelic hymn, or something else that reflects the nature of your deity.
- 6 The touch of your hand on a willing creature causes the creature to clearly picture your deity for but a split second. The creature immediately forgets the image but is convinced that it has seen something divine.

### FATE'S BENISON

Whether supernatural or coincidence, fate seems to favor you. Work with your DM to find a suitable benison for your rogue.

#### d6 Fate's Benison Effect

- 1 Light isn't reflected from you like from other creatures, causing your intricate features to be slightly blurred and making you harder to identify.
- 2 Lady Luck favors you and you seem to always land on your feet. For example, when gambling, at worst you break even, when walking in a random direction, you always seem to pick a direction that brings you closer to your goal.
- 3 When you land a killing blow, fate manifests a peculiarity. For example, the fatal wound could somehow always appear in a particular shape, or the slain creature could always remain standing (while dead) for an additional round before falling to the ground.
- 4 If a creature that doesn't know you well learns of your name and doesn't write it down, it inexplicably forgets the name after 24 hours.
- 5 Your speech and movements are masked by supernatural means. Hardly noticing it yourself, you adopt local dialects and mannerisms, making it impossible to discern where you grew up or to pick you out from a crowd.
- 6 Your deeds aren't attributed to you, but rather to a legendary rogue - a persona of almost mythical proportions. This persona is known by a mystical name such as "the Silence" or "the Sudden Blade". If you can convince another that you are this legendary rogue, you may be able to reap the benefits (or become a target). Otherwise, any illicit act you commit that doesn't have witnesses who can identify you are attributed to that persona.

- 4 Lightning splits the sky and a thunderous boom assaults the ears of all nearby whenever you cast a damaging spell.
- 5 The air around you seems to shimmer for several minutes after casting a spell and your blood sparkles with a radiant gleam.
- 6 When you cast a spell, you and minuscule objects (such as gravel) that aren't being worn or carried within 30 feet of you lift from the ground, floating a few inches above it. When the casting is complete, you and all affected objects gently float back down.

## ABILITY SCORE IMPROVEMENT

### 21ST-, 25TH-, AND 29TH-LEVEL EPIC SORCERER FEATURE

When you reach 21st level, and again at 25th and 29th level, you can increase one ability score of your choice by 2, or you can increase two ability scores of your choice by 1. Contrary to earlier levels, you can now improve your ability scores up to 24 using this feature.

## SORCEROUS ORIGIN FEATURE

### 21ST-, 25TH-, AND 28TH-LEVEL EPIC SORCERER FEATURE

You gain a feature from your sorcerous origin, detailed at the end of the class description or one from another source.

## EPIC SPELL CAPACITY

### 22ND-, 26TH-, AND 29TH-LEVEL EPIC SORCERER FEATURE

At 22nd level, you gain an additional 6th and 7th level spell slot, at 26th level you gain another 8th and 9th level spell slot, and at 29th level you gain a 10th, 11th and 12th level spell slot.

## FLEXIBLE CASTING MASTERY

### 23RD- AND 27TH-LEVEL EPIC SORCERER FEATURE

Upon reaching 27th level, you truly master the art of flexible casting. You convert sorcery points into spell slots more efficiently and can create spell slots of 8th level, as shown in the Creating Spell Slots After 27th Level table.

### CREATING SPELL SLOTS AFTER 27TH LEVEL

Spell Slot Level	Sorcery Point Cost

2nd	3
3rd	5
4th	6
5th	7
6th	9
7th	10
8th	11

## INTENSIFY SPELL

### 24TH-LEVEL EPIC SORCERER FEATURE

You gain the ability to intensify your offensive spells. Using this feature, all variable, numeric effects of a spell are maximized, then doubled. An intensified spell deals twice maximum damage, cures twice the maximum number of hit points, affects twice the maximum number of targets, and so forth, as appropriate. Saving throws and opposed rolls are not affected. An intensified spell uses up all spell slots of the spell's actual level, but a minimum of three, and once you use this feature, you immediately gain one level of exhaustion.

For example, you could cast the *fireball* spell using all of your 5th level spell slots (but a minimum of three), to deal 120 fire damage in a 40-foot radius, rather than 10d6 fire damage in a 20-foot radius if you had used just a single 5th level spell slot.

An intensified spell can't be interrupted by spells or effects such as the *counterspell* spell.

Once you use this feature, you must finish a short or long rest before you can do so again.

## WEAVE CONDUIT

### 30TH-LEVEL EPIC SORCERER FEATURE

Tapping into the Weave comes as easily to you as flicking a finger. With some effort, you can cause the Weave spill forth from within you, manifesting as violent arcane energy that crackles outwards from you in all directions.

Using a bonus action, you become a weave conduit for 1 minute. For the duration, you can cast a spell of 1st level or higher using both an action and a bonus action on the same turn, you know all spells from the sorcerer spell list, you can use all Metamagic options, including ones you haven't learned, and you can empower each spell you cast with any number of Metamagic options. As a weave conduit, you also absorb magic, giving you resistance to damage from spells and advantage on saving throws against spells.

Once you use this feature, you can't use it again until you finish a long rest.

## PART 3: MYTHIC PROGRESSION

**T**HE EPIC CLASS PROGRESSION IN THIS BOOK IS meant to represent the limits that mortals can achieve in the multiverse of Dungeons & Dragons. These are humans, elves, and dwarves in their most perfect forms. However, the most legendary fighter the humanoid races has ever seen honestly still has little chance against many epic monsters, let alone a deity. So what do you do, as a player or dungeon master, once you've killed everything you are able to kill? You could hang up your character sheets and roll a brand new one. But, you love these characters. You nursed them all the way to 30th level. You cheered alongside your friends after you pulled off that first daring raid of a goblin village. You nearly pulled your hair out when that beholder killed your entire party, only to discover that you were trapped in an illusion and were actually still alive. Oh the stories you could tell. These characters are family now. You can't just put them out to pasture. There must be something else to do, something else to fight. There is, of course. The monsters and gods exist, challenges far beyond what you have faced so far. But, while the intrigues and exploits of gods may make for fascinating story lines, you have no right to walk among them as weak you still are.

**Divine Ascension.** Enter Mythic progression. Such power does not come easily, however, and not many are able to claim it. After all, how would you go about shedding your own mortality? And why would the gods willingly let mortals dabble in their affairs? There are many questions, and even more obstacles to overcome. It is not unheard of for a wizard to take the relatively easy path and become a lich to achieve this goal, but there are other ways. This part is all up to the dungeon master, of course. Some characters may simply be part god from birth, a true demigod born of

both divine and mortal parents. Because of this, they don't possess the limits that mere mortals do and can continue to advance their skills. Other epic characters seek the favor of their god, they commit themselves as a servant and extension of their god's will in perpetuity in exchange for a small blessing of their divine spark, which is often enough to grant them access to unimagined power. For others, the transformation comes when they discover ancient, forbidden secrets and perform the dark rituals of the old gods.

**Final Tier of Play.** In any case, whatever path you choose, you will walk where only death waited for you before. But you must walk carefully now. Newly minted demigods attract a lot of attention, and you had better be ready for whatever comes your way. As a dungeon master, you may wish to limit access to one or two tiers of the mythic abilities, based on the end goals and intentions of your campaign (or exclude them altogether). The first tier represents an extension of normal abilities past normal limitations, what some might consider superhuman strength, skill, or awareness. But, as you progress to tiers two and three the abilities turn more and more godlike in their scope and power. While these tiers can be used to represent growth in a character's power from mortal to demigod to deity, it doesn't necessarily need to be so. Their use and inclusion into your campaign is entirely up to the dungeon master. A fully developed system for creating deities, including divine ranks and powers, followers, portfolios, and knowledge of how to obtain that elusive divine essence isn't included here. Those aspects of becoming and subsequently playing as a god are best carried out with great storytelling, and tend to lose something when codified into pages of charts and numbers. Instead, think of mythic progression simply as a flexible system, one that can be incorporated by a clever dungeon master in any number of ways.

# MYTHIC BOONS

A mythic boon is a special power available only to 30th level characters. Characters at that level gain such boons only if you want them to and only when you feel it's appropriate. Epic boons are best awarded after the characters complete a major quest, or accomplish something else particularly notable. A character might gain a mythic boon after destroying an evil artifact, defeating a demigod, or halting an incursion from the Outer Planes.

**Categories and Prerequisites.** Boons are divided into three major categories: 1st-level, 2nd-level, and 3rd-level. 1st-level boons are generally best described as superpowers. 2nd-level boons rival the power of demigods. 3rd-level boons are truly godlike. Some boons also come with one or more prerequisites. These prerequisites help to ensure progression, class identity, and some semblance of balance. Some boons have a prerequisite of 20th level in a certain class. This doesn't mean the boon is available at 20th level, but rather that at least 20 of your 30 levels must be in the specified class.

**Mythic Boons as Mythic Progression.** Mythic boons can also be used as a form of advancement, a way to provide greater power to characters who have no more levels to gain. With this approach, consider awarding one epic boon to each character for every 300,000 XP he or she has reached 30th level.

When using this approach, a character needs to select six 1st-level boons before any 2nd-level boons can be selected. In a similar fashion, a character needs to select four 2nd-level boons before any 3rd-level boons can be selected. Once a level of boons has been unlocked, a character can gain any future boons from the unlocked level.

**Final Arbiter.** You determine which epic boon a character gains. Ideally, the boon you pick is something the character would put to use in future adventures. You can allow a player to select a boon for his or her character, subject to your approval.

**Roleplaying Boons.** Whatever boon a character ends up with, consider its place in your story and world. Many of the boons are extraordinary and represent the gradual transformation of a character into something resembling a demigod or even a deity. The acquisition of a boon might visibly transform a character. For example, the eyes of a character with the Boon of True Sight might glow when he or she feels strong emotion, and a character who has the Boon of High Magic might have faint motes of light glimmering around his or her head. Also, decide how the boon first appears. Does the boon appear spontaneously and mysteriously? Or does a being of cosmic power manifest to bestow it? The bestowal of a boon can itself be an exciting scene.

The text of a boon addresses its user. Unless a boon says otherwise, a character can't gain it more than once.

# MYTHIC MANEUVERS

## MYTHIC MANEUVERS

Mythic maneuvers work much like mythic boons and are awarded in the same manner. However, where boons tend to be passive in nature, maneuvers are more active and their use comes with a cost.

**Maneuver Levels.** When you select a maneuver, you gain a number of Mythic Dice equal to twice the maneuver's level. For example, if you were to select a 2nd-level maneuver, you would also gain 4 Mythic Dice. Mythic dice are d20s. A Mythic Die is expended when you use it. Each maneuver describes how many Mythic Dice it costs to perform that maneuver, if any. You regain all of your expended Mythic Dice when you finish a short or long rest.

**Maneuver Save DC.** Some maneuvers require one or more creatures to make a saving throw. Each such maneuver explains how the save DC is calculated.

### 1ST-LEVEL MYTHIC MANEUVERS

#### ARCING STRIKE

**Prerequisites:** A Strength score of 24 or higher

**Saving Throw DC:** 8 + your proficiency bonus + your Strength modifier

**Cost:** 1 Mythic Die

As an action, you swing your weapon in a wide arc around yourself. Each creature within your reach must make a Dexterity saving throw. On a failed save, a target takes weapon damage equal to your Strength modifier plus the expended Mythic Die, and if the target is Large or smaller, it is also pushed 5 feet backwards in a straight line from you.

#### DEEP POCKETS

**Prerequisites:** 20th level rogue

As an action, you can open a 2-foot cubed extra dimensional space and place an object inside. The gateway to this space then closes as soon as you remove your hand. The space exists for up to 1 hour, after which time the stored object appears at your feet directly in front of you. At any point before the time is up, you can choose to summon the object into your empty hand. You can choose to expend a Mythic Die when using this maneuver. If you do, you add the expended Mythic Die to the number of hours the space exists.

Once you use this feature, you must finish a short or long rest before you can use it again.

#### EPIC RECOVERY

**Prerequisites:** Extra Attack

**Cost:** 1 Mythic Die

You can use a bonus action to regain a number of hit points equal to half your hit point maximum. In addition, you gain a number of temporary hit points equal to the Mythic Die or dice expended. Once you use this boon, you can't use it again until you finish a short or long rest.

#### FLASH STEP

**Prerequisites:** A Dexterity score of 24 or higher

**Cost:** 1 Mythic Die

As a reaction when an enemy makes a melee attack against you, but before you know if the attack hits you or not, you can teleport a number of feet equal to half your walking speed to an unoccupied space that you can see. When you teleport away in this manner, the triggering attack misses you automatically and is wasted.

#### GROUND SLAM

**Prerequisites:** A Strength score of 24 or higher

**Saving Throw DC:** 8 + your proficiency bonus + your Strength modifier

**Cost:** 1 Mythic Die

As an action, you smash your weapon into the ground. Each creature within 30 feet of you that can hear must make a Constitution saving throw, taking thunder damage equal twice your Strength score on a failed save, or half as much on a successful one. Large and smaller creatures that fail the saving throw are also knocked prone.

You add your expended Mythic Dice to the radius and the damage done.

#### HEROIC LEAP

**Prerequisites:** Proficiency with the Athletics skill, a Strength score of 22 or higher

**Cost:** 1 Mythic Die

Using a bonus action, you leap a number of feet up to your Strength score plus the expended Mythic Die in any direction. You don't need a running start.

#### ONE SHOT, TWO KILLS

**Prerequisites:** A Dexterity score of 24 or higher

**Cost:** 1 Mythic Die

Using a bonus action, you cause your ranged weapon attacks to pierce through your target until the end of your turn. For the duration, when you hit a target with a ranged weapon attack and there is another target within range of your attack and directly behind the target, you can make an additional attack against that target. Your primary target takes damage as normal, and the secondary target takes damage equal to the expended Mythic Die with each hit.

#### PERONEAL STRIKE

**Prerequisites:** Dexterity score of 24 or higher

**Saving Throw DC:** 8 + your proficiency bonus + your Dexterity modifier

**Cost:** 1 Mythic Die

When you hit a creature with a weapon attack, you can use your bonus action to land a peroneal strike. The target must succeed a Constitution saving throw or be stunned until the end of your next turn. If the target has less than 100 hit points, it fails the saving throw automatically. You add the expended Mythic Die to the damage done.

Constructs, oozes, and undead automatically succeed on the saving throw.

#### SLICE AND DICE

**Prerequisites:** Dexterity score of 24 or higher

**Cost:** 1 Mythic Die

Using an action, you make a melee weapon attack against each target within range. You must use a weapon that has the finesse property. You add the expended Mythic Die to the damage done.

#### WELL OF ETERNAL SPRING

**Prerequisites:** 20th level kensai or monk

**Cost:** 1 Mythic Die

Using an action, you regain all expended ki. Once you use this maneuver, you can't use it again until you finish a long rest.

## 2ND-LEVEL MYTHIC MANEUVERS

### DISTANT SHOT

**Prerequisites:** A Dexterity score of 24 or higher

**Cost:** 2 Mythic Dice

Using a bonus action, the next ranged weapon attack you make during your turn, can be fired at any target you can see, regardless of its range, and you don't suffer disadvantage on the shot. You add the expended Mythic Dice to the damage you deal.

### DREADNOUGHT

**Prerequisites:** A Strength score of 26 or higher

**Cost:** 2 Mythic Dice

Using an action, your movement can't be stopped by normal means until the end of your turn. You can move through the space of other creatures and through structures that aren't made from an indestructible material.

If you move through the space of a creature, the creature must make a Strength saving throw. On a failed save, the creature takes bludgeoning damage equal to your Strength score plus the expended Mythic Dice and lands prone. On a successful save, the creature takes half the damage and is pushed to an unoccupied space adjacent to its current space. A creature can only take this damage once on a turn.

If you move through a structure, you deal 50 bludgeoning damage to it, break through it, and leave behind a hole in the structure equal to your size.

### FAR DISMISSAL

**Prerequisites:** A Strength score of 24 or higher

**Saving Throw DC:** 8 + your proficiency bonus + your Strength modifier

**Cost:** 2 Mythic Dice

When you hit a creature with a melee attack, you can use your reaction to attempt to grapple the creature before hurling it away. First, make a Strength (Athletics) check opposed by the creature's Strength (Athletics) or Dexterity (Acrobatics) check. If you successfully grapple the target, it must make a Strength saving throw. On a failed save, your hurl the creature in a direction of your choosing. The dis-

tance the creature is hurled equals 5 x the expended Mythic Dice. The target takes fall damage for the distance thrown.

### FLASH STRIKE

**Prerequisites:** A Dexterity score of 26 or higher

**Cost:** 2 Mythic Dice

When a hostile creature ends its turn within a number of feet of you equal to your walking speed, you can use your reaction to teleport a number of feet up to your walking speed to an unoccupied space adjacent to the creature. When teleporting in this manner, as part of the same reaction, you can choose to make a melee attack against the triggering creature after teleporting.

### INVINCIBILITY

**Cost:** 1 Mythic Die

When you take damage from any source, you can reduce that damage to 0. Once you use this maneuver, you can't use it again until you finish a short rest.

### LEGENDARY RECOVERY

**Prerequisites:** Epic Recovery

When you use your Epic Recovery, you can expend a total of two Mythic Dice to instead regain a number of hit points equal to your hit point maximum.

### MIGHTY RAGE

**Prerequisites:** 20th level barbarian

**Cost:** 2 Mythic Dice

Using a bonus action while you rage, you gain a +4 bonus to your Strength score (up to a maximum of 34) until the end of your turn. In addition, the first melee weapon attack you make that uses Strength and hits a target on this turn, deals extra weapon damage equal to the expended Mythic Dice.

### SPONTANEOUS REGENERATION

**Prerequisites:** A Constitution score of 24 or higher

**Cost:** 2 Mythic Dice

Using a bonus action, your wounds begin to heal before your eyes. For 1 minute, you regain a number of hit points equal to the expended Mythic Dice at the start of each of your turns. If you take fire or radiant damage, your regeneration doesn't function until the end of your next turn. If you take no fire or radiant damage while regenerating, any limbs you might have lost grow back after 1 minute.

## 3RD-LEVEL MYTHIC MANEUVERS

### CHANGE SHAPE

**Cost:** 3 Mythic Dice

You magically polymorph into a humanoid that has a challenge rating equal to or less than your own, or back into your true form. Any equipment you are wearing or carrying is absorbed or borne by the new form (your choice).

In a new form, you retain all of your statistics and gain the features of the new form that you don't have already (except class features, legendary actions, and lair actions).

### CHANGE SIZE

**Cost:** 3 Mythic Dice

You magically change your size, choosing between Tiny, Small, Medium, Large, Huge, and Gargantuan (up to 40 ft. tall). Your statistics remain the same. Any equipment you are wearing or carrying transforms with you.

While Tiny, your reach decreases by 5 feet. While Small, Medium, or Large your reach is as normal. While Huge, your reach increases by 5 feet, and while Gargantuan, your reach increases by 10 feet.

## DEADLY WOUNDS

**Prerequisites:** 20th level rogue, a Dexterity score of 28 or higher

**Skill Check DC:** 8 + your proficiency bonus + your Dexterity modifier

**Cost:** 3 Mythic Dice

Using a bonus action when you deal sneak attack damage with a melee weapon attack, you twist the blade to inflict a lingering wound upon your target. At the start of each of the target's turns, it takes weapon damage equal to the expended Mythic Dice, until a creature uses an action to staunch the wound with a successful Wisdom (Medicine) check or until the target receives magical healing.

## FATE WEAVING

**Prerequisites:** 20th level bard or shogun, a Charisma score of 26 or higher

**Cost:** 3 Mythic Dice

When you or a creature within 60 feet of you is forced to make a saving throw, you can add one or more of the expended Mythic Dice to the roll. If the roll is successful, the creature that forced the saving throw takes psychic damage equal to your Charisma score plus the Mythic Dice that weren't added to the saving throw.

## GLEAM OF BREAKING

**Prerequisites:** 20th level cleric, a Wisdom score of 26 or higher

**Cost:** 3 Mythic Dice

Using an action, you target a creature that you can see within 60 feet. The target must make a Constitution saving throw. The save DC equals the total of the expended Mythic Dice. On a failed save, the target loses concentration and can't concentrate on spells or other effects until the end of its next turn. If the target succeeds on its saving throw, it loses one charge of its Legendary Resistance trait if it possesses that trait, or takes radiant damage equal to the expended Mythic Dice if it doesn't.

## LEGENDARY SMITE

**Prerequisites:** 20th level paladin, a Strength or Charisma score of 26 or higher

**Cost:** 3 Mythic Dice

Using a bonus action, your weapon begins to gleam with divine energy. The next time you hit a creature with a melee weapon attack during this turn, the target takes additional radiant damage equal to the expended Mythic Dice, and the target must make a Charisma saving throw. On a failed save, the target loses one charge of its Legendary Resistance if it possesses that trait. If it doesn't have the trait, or has no charges remaining, it takes twice the radiant damage.

## MIGHTY LEAP

**Prerequisites:** 20th level barbarian, a Strength score of 30

**Saving Throw DC:** 8 + your proficiency bonus + your Strength modifier

**Cost:** 3 Mythic Dice

You learn to lift off the ground in an awesome display of power. Using an action, you leap a number of miles up to half the Mythic Dice expended. Describe your leap by stating distance and direction, such as "11 miles to the north" or "5 miles straight up".

You can bring along objects as long as their weight doesn't exceed what you can carry. You can also bring up to two creatures of your size or smaller who are carrying gear up to its carrying capacity, or one creature up to one size larger than you. Any creatures you bring with you, must be grappled by you when you make the leap.

While leaping, you travel at a speed of 1,000 feet each round (or 1 mile every 5 rounds). You can't change trajectory after taking off but you can drop objects and creatures you are holding. If you drop a creature, it can attempt to hang on to you by succeeding a Strength (Athletics) check against your opposed Strength (Athletics) or Dexterity (Acrobatics) check.

If you hit a structure while leaping, you burst through it and deal 50 bludgeoning damage to the structure for each wall you pass through. If you hit a structure of an indestructible material, your leap is halted and you (and any creatures you might be carrying) take fall damage for the distance traveled.

If you land in water, a 300-foot high and 50-foot thick circular wave extends from the point of impact and travels outwards in all directions. At the start of each of your turns after the wave appears, the wave, along with any creatures in it, moves 50 feet away from you. Any Huge or smaller creature inside the wave or whose space the wave enters when it moves must succeed on a Strength saving throw or take 6d10 bludgeoning damage. A creature can take this damage only once per round. At the end of the turn, the wave's height is reduced by 50 feet, and the damage creatures take from the wave on subsequent rounds is reduced by 1d10. When the wave reaches 0 feet in height, the wave disperses.

If you land on the ground, an intense tremor rips through the ground in a 100-foot-radius circle centered on you and shakes structures and creatures other than you and any creatures you carry in contact with the ground in that area.

The ground in the area becomes difficult terrain. Each creature on the ground that is concentrating must make a Constitution saving throw. On a failed save, the creature's concentration is broken.

Each creature on the ground in the area must make a Dexterity saving throw. On a failed save, the creature is knocked prone.

This maneuver can have additional effects depending on the terrain in the area, as determined by the DM.

Fissures open throughout the affected area at the start of your next turn after you perform the maneuver. A total of 1d6 such fissures open in locations chosen by the DM. Each is 1d10 x 10 feet deep, 10 feet wide, and extends from one edge of the affected area to the opposite side. A creature standing on a spot where a fissure opens must succeed on a Dexterity saving throw or fall in. A creature that successfully saves moves with the fissure's edge as it opens. A fissure that opens beneath a structure causes it to automatically collapse.

The tremor deals 50 bludgeoning damage to any structure in contact with the ground in the affected area and at the start of each of your turns until effect ends. If a structure drops to 0 hit points, it collapses and potentially damages nearby creatures. A creature within half the distance of a structure's height must make a Dexterity saving throw. On a failed save, the creature takes 5d6 bludgeoning damage, is knocked prone, and is buried in the rubble, requiring a DC 20 Strength (Athletics) check as an action to escape. The DM can adjust the DC higher or lower, depending on the nature of the rubble. On a successful save, the creature takes half as much damage and doesn't fall prone or become buried.

The fissures and surrounding difficult terrain last for 1d4 rounds.

You and any creatures you might be carrying take no damage from falling when landing on the ground or in a body of water after you leap in this manner.

### MYTHIC RECOVERY

**Prerequisites:** Legendary Recovery

When you use your Epic Recovery, you can expend a total of three Mythic Dice to instead have your hit point maximum return to normal if it has been reduced regardless of how it was reduced. You then regain a number of hit points equal to your hit point maximum.

### MYTHIC WILD SHAPE

**Prerequisites:** 20th level druid, a Wisdom score of 26 or higher

**Cost:** 3 Mythic Dice

Using an action, you transform into a type of creature that your Wild Shape allows. The maximum CR equals half the Mythic Dice expended. In addition, the creature you transform into can be of any size. All other rules of your Wild Shape feature apply.

### MYSTIC ASSAULT

**Prerequisites:** 20th level kensai or monk, a Dexterity score of 26 or higher

**Cost:** 3 Mythic Dice

Using a bonus action, your movement speed increases by a number of feet equal to the Mythic Dice expended. Until the end of your turn, you don't provoke opportunity attacks and you can move through the spaces of other creatures, but you can't end your turn in an occupied space. In addition, if you take the Attack action on this turn, you can make a melee attack against each creature you come within range of during this turn.

### OATH OF SLAYING

**Prerequisites:** 20th level ranger or rogue, a Strength or Dexterity score of 26 or higher

**Cost:** 3 Mythic Dice

Using a bonus action, you swear to slay a creature that you can see. The oath lasts until the target dies or until seven days later. You can only have one such oath in place at a time. Roll the three Mythic Dice individually. The roll of the first Mythic Die grants you a bonus to all attack rolls against the target creature. The second Mythic Die grants you a bonus to your weapon damage against the target creature. The third Mythic Die grants you a bonus to your AC against attacks from the target creature. Your target also gains no benefit from cover against your attacks except from full cover and you can't suffer disadvantage with your attacks against the target.

### PROJECTED STRIKE

**Prerequisites:** 20th level fighter, kensai, or ranger

**Cost:** 3 Mythic Dice

Using your action, you swiftly swing a melee weapon in a wide arc and a projected strike erupts from your weapon. Each creature in a 60-foot cone must make a Dexterity saving throw. A creature takes force damage equal to your weapon damage plus the expended Mythic Dice on a failed save or half as much on a successful one.

### SUNDER ARMOR

**Prerequisites:** 20th level fighter, a Strength score of 28 or higher

**Cost:** 3 Mythic Dice

Using an action, you make a single weapon attack against a creature within range. If you hit the target, it takes additional weapon damage equal to the expended Mythic Dice, and has its AC reduced by an amount equal to the expended Mythic Dice divided by 3. The AC reduction lasts until the start of your next turn.

### SWIFT FLASH STEP

**Prerequisites:** A Dexterity score of 24 or higher

**Cost:** 3 Mythic Dice

As a reaction when an enemy makes an attack against you, whether you are hit or not, you can teleport a number of feet equal to twice your walking speed to an unoccupied space that you can see. When you teleport away in this manner, the triggering attack misses you automatically and is wasted.

### WHIRLING DEVASTATION

**Prerequisites:** A Strength score of 26 or higher

**Saving Throw DC:** 8 + your proficiency bonus + your Strength modifier

**Cost:** 3 Mythic Dice

As an action, you begin to rotate swiftly, continuously swinging your weapon in a wide arc around yourself. While whirling around in this manner, you are incapacitated, your movement speed is halved, ranged weapon attacks are made against you with disadvantage, and the first time on a turn you move within reach of a creature or when a creature ends its turn within your reach, the creature must make a Dexterity saving throw. On a failed save, a target takes weapon damage equal to your Strength score plus the expended Mythic Dice. On a successful save, a target takes half the damage.

You continue to whirl around for 3 rounds, until you end the effect (no action required), or until you drop unconscious.

### TITANIC SLAM

**Prerequisites:** 20th level barbarian or monk

**Saving Throw DC:** 8 + your proficiency bonus + your Strength or Dexterity modifier

**Cost:** 3 Mythic Dice

Using your action you make a single powerful melee weapon attack or unarmed attack with advantage. On a hit, you deal additional damage with the attack equal to the expended Mythic Dice, and the target is hurled into the air at an angle between 0 and 45 degrees. The target is moved backwards a number of feet depending on its size, as shown in the table below:

Size	Distance
Tiny	1,000 feet
Small	500 feet
Medium	500 feet
Large	200 feet
Huge	100 feet
Gargantuan	50 feet

The target takes falling damage for the distance it was hurled and must succeed a Constitution saving throw or be stunned for 1 minute. The target can repeat the saving throw at the end of each of its turns, ending the effect on itself on a successful save.

# MYTHIC SPELLS

Mythic spells work much like mythic boons and are awarded in the same manner.

**Spell Levels.** Every mythic spell has a level from 1 to 3. A spell's level is a general indicator of how powerful it is. For purposes of effects that are calculated based on spell levels (such as the *counterspell* spell), a 1st level mythic spell is equivalent of a 15th level spell, a 2nd level mythic spell is equivalent of a 17th level spell, and a 3rd level mythic spell is equivalent of a 19th level spell.

**Spells Known.** When you're eligible to learn a mythic spell, you can select it from your class's Mythic Spell list. You must be at least 20th level in a class to select spells from its Mythic Spell list (and 30th character level). Once you have learned a spell, you know the spell and always have it fixed in your mind.

You must learn four 1st level mythic spells before you can learn 2nd level mythic spells. In a similar fashion, you must learn at least four 2nd level mythic spells, before you can learn a 3rd level mythic spell.

**Spell Slots.** When you learn a mythic spell you also gain a spell slot equal to the spells level. For example, if you learn the 2nd level mythic spell *antimagic cage*, you would also gain a 2nd level mythic spell slot.

When you cast a mythic spell, you expend a mythic slot of that spell's level or higher, effectively "filling" a slot with the spell. Just as with regular spells, you can always cast a lower level mythic spell using a higher level mythic spell slot. You can't, however, cast regular spells using your mythic spell slots; they can only be used to cast mythic spells.

Finishing a long rest restores any expended mythic spell slots.

## MYTHIC SPELL DESCRIPTIONS

### AEGIS

*1st-level mythic abjuration*

**Casting Time:** 1 reaction, which you take when you are hit by an attack or targeted by a spell that deals force damage

**Range:** Self

**Components:** V, S

**Duration:** 1 round

An invisible barrier of magical force appears and protects you. Until the start of your next turn, you have a +10 bonus to AC, including against the triggering attack, and you are immune to force damage.

### ALL-SEE

*2nd-level mythic divination*

**Casting Time:** 1 action

**Range:** Self

**Components:** V, S

**Duration:** Concentration, up to 48 hours

Describe or name a creature, object, or location as your target. You attempt to find your target, magically scanning through hundreds or even thousands of mental images. The time it takes you to locate your target depends on your familiarity with the target and the distance to it, as shown in the table below.

Familiarity	1 mile	10 miles	100 miles	1000 miles	> 1000 miles
Very familiar	Instantly	1 minute	10 minutes	1 hour	4 hours
Familiar	1 minute	10 minutes	1 hour	4 hours	8 hours
Seen casually	10 minutes	1 hour	4 hours	8 hours	12 hours
Seen once	1 hour	4 hours	8 hours	12 hours	24 hours
Description	4 hours	8 hours	12 hours	24 hours	48 hours

Once you have located your target, you sense the distance and most direct route to it. If the target is moving, you know the direction of its movement.

If the target is on a different plane of existence than you, you spend the entire duration searching for the target but don't learn anything in the end.

When the spell ends, you stop perceiving in this manner.

**Familiarity.** "Very familiar" is a creature or object you have had daily contact with for a long time, such as a sibling or your favorite weapon, or a location you have frequented daily such as an old home or a school you attended.

"Familiar" is a creature or object you know very well, such as an uncle or a parent's favorite hat, or a location you have frequented regularly, such as a lake near your childhood home.

"Seen casually" is a creature, object, or location you have seen more than once.

"Seen once" is a creature, object, or location you have seen once, possibly by using magic.

"Description" is a creature, object, or location you know through someone else's description, perhaps from a drawing, a text, or a map. If such a target is more than 1,000 miles away from you, you sense the distance and most direct route for but a second before the spell ends.

### ANTIMAGIC CAGE

*2nd-level mythic abjuration*

**Casting Time:** 1 action

**Range:** 100 feet

**Components:** V, S, M (a pinch of powdered iron and ruby dust worth 10,000 gp which the spell consumes)

**Duration:** 1 hour

An immobile, invisible, cube-shaped prison composed of magical force springs into existence around an area you choose within range. The prison is a solid box.

The prison can be up to 10 feet on a side, creating a solid barrier that prevents any matter from passing through it and blocking any spells cast into or out of the area.

When you cast the spell, any creature that is completely inside the cage's area is trapped. Creatures only partially within the area, or those too large to fit inside the area, are pushed away from the center of the area until they are completely outside the area.

The inside of the prison is divorced from the magical energy that suffuses the multiverse. Within the prison, spells can't be cast, summoned creatures disappear, and even magic items become mundane.

Spells and other magical effects, except those created by an artifact or a deity, are suppressed in the prison and can't protrude into it. A slot expended to cast a suppressed spell is consumed. While an effect is suppressed, it doesn't function, but the time it spends suppressed counts against its duration.

**Targeted Effects.** Spells and other magical effects, such as *magic missile* and *charm person*, that target a creature or an object in the prison have no effect on that target.

**Areas of Magic.** The area of another spell or magical effect, such as *fireball*, can't extend into the prison. If the prison overlaps an area of magic, the part of the area that is covered by the prison is suppressed. For example, the flames created by a *wall of fire* are suppressed within the prison, creating a gap in the wall if the overlap is large enough.

**Spells.** Any active spell or other magical effect on a creature or an object in the prison is suppressed while the creature or object is in it.

**Magic Items.** The properties and powers of magic items are suppressed in the prison. For example, a +1 long sword in the prison functions as a nonmagical long sword.

**Magical Travel.** Teleportation and planar travel fail to work in the prison, whether the prison is the destination or the departure point for such magical travel. A portal to another location, world, or plane of existence, as well as an opening to an extradimensional space such as that created by the *rope trick*, temporarily closes while in the prison.

**Creatures and Objects.** A creature or object summoned or created by magic temporarily winks out of existence in the prison. Such a creature instantly reappears once the space the creature occupied is no longer within the prison.

If a captured creature tries to leave the cage by using teleportation or interplanar travel from an effect that isn't a spell, it must first make a Charisma saving throw. On a success, the creature can use that effect to exit the cage. On a failure, the creature can't exit the cage and remains imprisoned. The cage also extends into the Ethereal Plane, blocking ethereal travel.

Spell and magical effects such as *dispel magic* and *purge magic* have no effect on the prison, and an *antimagic field* doesn't suppress it.

## AWAKEN WOODS

*2nd-level mythic transmutation*

**Casting Time:** 8 hours

**Range:** Touch

**Components:** V, S, M (an agate worth at least 20,000 gp, which the spell consumes)

**Duration:** Instantaneous

After spending the casting time tracing magical pathways within a precious gem stone, you plant it into the ground. Plants in a 100-foot radius centered on you with no Intelligence score or an Intelligence of 3 or less, gain an Intelligence of 10. All plants awakened in this manner also gain the ability to speak one language you know and gain the ability to move their limbs, roots, vines, creepers, and so forth. Lastly, awakened plants gain senses similar to a human's.

Plants that have been awakened in this manner can't travel further than 1 mile from the space in which it was awakened. If it does, it immediately returns to the state it was in before it was awakened.

Your DM chooses statistics appropriate for all awakened plants, such as the statistics for **awakened shrubs** or **awakened trees**.

An awakened plant is charmed by you for 30 days or until you or your companions do anything harmful to it. When the charmed condition ends, the awakened plant chooses whether to remain friendly to you, based on how you treated it while it was charmed.

**At Higher Levels.** When you cast this spell using a mythic spell slot of 3rd level, the spell affects plants within 1 mile.

## BOUNDLESS RADIANCE

*3rd-level mythic evocation*

**Casting Time:** 1 action

**Range:** Self

**Components:** V, S, M (A reliquary worth at least 50,000 gp containing a sacred relic of legend)

**Duration:** Concentration, up to 1 minute

Divine radiance surrounds you, creating bright light in a 30-foot radius around you and dim light for an additional 30 feet. This light is sunlight. A fiend or undead that starts its turn in this light must succeed a Constitution saving throw or take 100 radiant damage and become blinded until the start of its next turn. In addition, you can't be reduced below 1 hit point for the duration.

When the spell ends, the light washes outwards from you, illuminating a 1-mile radius area for a split second. A fiend or undead in the illuminated area must make the saving throw.

## CIRCLE OF INCURSION

*1st-level mythic conjuration*

**Casting Time:** 24 hours

**Range:** 60 feet

**Components:** V, S, M (rare chalks and inks infused with precious gems worth 5,000 gp, which the spell consumes)

**Duration:** 7 days

As you cast the spell, you draw a 60-foot-diameter circle on the ground inscribed with sigils that link your location to a location you know on any plane of existence. A shimmering portal opens within the circle you drew and remains open for 7 days. For the duration, an identical circle appears at your chosen destination. Any creature that enters either circle instantly appears within 5 feet of the other circle or in the nearest unoccupied space if that space is occupied.

While they exist, both circles count as permanent teleportation circles, and allow incoming teleportation if a caster

knows their sigil sequences.

## CONJURE DRAGON

*1st-level mythic conjuration*

**Casting Time:** 1 action

**Range:** 120 feet

**Components:** V, S, M (dragon scales worth at least 5,000 gp which the spell consumes)

**Duration:** Concentration, up to 1 hour

You summon an adult chromatic or metallic dragon, which appears in an unoccupied space that you can see within range. The dragon disappears when it drops to 0 hit points or when the spell ends.

The dragon is friendly to you and your companions for the duration. Roll initiative for the dragon, which has its own turns. It obeys any verbal commands that you issue to it (no action required by you). If you don't issue any commands to the dragon, it defends itself from hostile creatures but otherwise takes no actions.

The dragon's color is identical to the scales you provided as a material component for this spell. The DM has the dragon's statistics.

## CONJURE DRAGONFLIGHT

*2nd-level mythic conjuration*

**Casting Time:** 1 minute

**Range:** 300 feet

**Components:** V, S, M (dragon scales worth at least 50,000 gp which the spell consumes and a brazier or container filled with a material dependent on the color of the dragon scales)

**Duration:** Concentration, up to 1 minute

You summon ten adult chromatic or metallic dragons, which appear in unoccupied spaces that you can see within range. The dragons disappear when they drop to 0 hit points or when the spell ends.

The dragons are friendly to you and your companions for the duration. Roll initiative for the dragons, which have their own turns. They obey any verbal commands that you issue to them (no action required by you), but they can't be given individual commands. If you don't issue any commands to the dragons, they defend themselves and each other from hostile creatures but otherwise take no actions.

The additional materials needed are as follows:

Scale Color	Additional Material
Black	1 gallon of acid
Blue	10 metal rods
Brass	5 lbs. of coal and a fire
Bronze	10 metal rods
Copper	1 gallon of acid
Gold	5 lbs. of coal and a fire
Green	1 gallon of poison harvested from plants
Red	5 lbs. of coal and a fire
Silver	5 lbs. of snow or ice
White	5 lbs. of snow or ice

The color of the dragons is identical to the scales you provided as a material component for this spell. The DM has the statistics for the dragons.

### CONTINGENT RESURRECTION

*3rd-level mythic necromancy*

**Casting Time:** 1 hour

**Range:** Touch

**Components:** V, S, M (diamonds worth at least 20,000 gp, which the spell consumes)

**Duration:** 24 hours

You touch a willing creature for the duration of the casting. For the duration of the spell, if the creature dies, it returns to life at the start of its next turn with all its hit points. If the soul isn't free or willing, it is forcefully freed from whatever magic or prison is holding it back.

This spell neutralizes any poisons and cures curses and diseases afflicting the creature when it died.

This spell also closes all mortal wounds and restores any missing body parts when it restored a creature to life.

Coming back from the dead is an ordeal. The target takes a -4 penalty to all attack rolls, saving throws, and ability checks. Every time the target finishes a long rest, the penalty is reduced by 1 until it disappears.

### CROWN OF VERMIN

*3rd-level mythic conjuration*

**Casting Time:** 1 action

**Range:** Self

**Components:** V, S

**Duration:** 1 minute

Ten thousand insects appear from thin air and cover you as a second layer of skin, granting you 100 temporary hit points. Whenever you lose 1 temporary hit point, 100 of these insects die and disappear with a faint popping noise. While you have more than 50 temporary hit points remaining, you have total cover against attacks and effects.

If a creature hits you with a melee attack while you have temporary hit points remaining, the insects bite the attacker before dying, causing the attacker to take magical piercing damage equal to the number of temporary hit points you lost from the attack.

### DELAYED HEALING SURGE

*1st-level mythic evocation*

**Casting Time:** 1 action

**Range:** Touch

**Components:** V, S

**Duration:** 1 hour

You touch a willing creature, sending a surge of magical healing through its body that lies dormant. The healing surge is a pool of 100 hit points. For the duration, when the target takes damage it instantly regains a number of hit points equal to the damage taken but to a maximum of the remaining pool. When there are no more hit points in the pool, the spell ends.

Each time the target is healed by the pool, the spell also ends blindness, deafness, and any diseases affecting the target.

This spell has no effect on constructs or Undead.

**At Higher Levels.** When you cast this spell using a mythic spell slot of 2nd level or higher, the pool of stored healing increases by 50 for each mythic spell slot above 1st.

### EIDOLON

*2nd-level mythic enchantment*

**Casting Time:** 1 hour

**Range:** Touch

**Components:** V, S, M (a strand of hair, a nail, or some other physical token from your body)

**Duration:** 8 hours

You create an exact duplicate of yourself. For the duration, you and your duplicate can communicate telepathically with each other, and the duplicate obeys your telepathic commands. The duplicate has all of the same abilities, spells, and class features as you do.

For the duration of the spell, both you and the duplicate have disadvantage on ability checks, attack rolls, and saving throws, and the spell save DC for both of you is reduced by 5.

The duplicate disappears when it drops to 0 hit points or when the spell ends. If you die while your duplicate yet lives, your consciousness is magically transferred to the duplicate, making its body your new body, after which the spell ends.

### ENSLAVE

*2nd-level mythic enchantment*

**Casting Time:** 1 action

**Range:** Touch

**Components:** V, S, M (an object the target remembers fondly from its childhood)

**Duration:** Instantaneous

You touch a creature that you can see. The target must succeed on a Wisdom saving throw or be magically charmed by you until you die or until you are on a different plane of existence from the target. The charmed target is under your control and can't take reactions, and the you and the target can communicate telepathically with each other over any distance.

Whenever the charmed target takes damage, the target can repeat the saving throw. On a success, the effect ends. No more than once every 24 hours, the target can also repeat the saving throw when it is at least 1 mile away from you.

## ETERNAL FREEDOM

*2nd-level mythic abjuration*

**Casting Time:** 1 action

**Range:** Self

**Components:** V, S, M (a broken chain link made of adamantite and a bird feather)

**Duration:** Up to 24 hours

For the duration, your movement is unaffected by difficult terrain, and spells and other magical effects can neither reduce your speed nor cause you to be paralyzed or restrained.

You can also spend 5 feet of movement to automatically escape from nonmagical restraints, such as manacles or a creature that has you grappled. Finally, being underwater imposes no penalties on your movement or attacks and you gain a flying speed equal to your walking speed.

The spell ends when you finish a long rest.

## GENESIS

*3rd-level mythic transmutation*

**Casting Time:** Special

**Range:** Special

**Components:** V, S

**Duration:** Special

You attempt to create your own plane within the Astral Plane. In order to create your plane, you must cast this spell each day for a year, spending 10 minutes for each casting. If you miss a single day, you must start over. When you complete the casting on the last day, your plane is created.

Your plane is of a size as you define, from a 1-mile radius area to an infinite space. You can name it however you like and can shape it in any way you want, though it must befit your alignment to which the plane becomes bound.

Once per day, while on your plane, you can cast this spell to try and shape an additional layer on your plane. In order to do so, you must cast this spell again each day for 6 months while within your plane, and have to start over if you miss a day. The second layer can be different from the first, and you decide how transportation is possible from one layer to another.

Once your plane is willed into existence, you can always teleport to it as an action, or teleport back to the location you left, also by as an action.

If you die outside of your plane, you reform within your plane 1 year after your death, unless your soul was destroyed.

You can only create one plane in this manner, and if you somehow forget this spell, the plane instantly ceases to exist, expelling all inhabitants into the unoccupied spaces nearest to you.

Your plane might eventually attract other inhabitants such as celestials, fiends, or even more exotic creatures, at your DM's discretion.

## GREATER REVERSE GRAVITY

*3rd-level mythic transmutation*

**Casting Time:** 1 action

**Range:** Special

**Components:** V, S

**Duration:** 1 hour

This spell reverses gravity in a 1-mile-radius, 1-mile high cylinder centered on you. All creatures and objects that aren't somehow anchored to the ground in the area fall upward and reach the top of the area when you cast this spell. A creature can make a Dexterity saving throw to grab onto

a fixed object it can reach, thus avoiding the fall.

If some solid object (such as a ceiling) is encountered in this fall, falling objects and creatures strike it just as they would during a normal downward fall. If an object or creature reaches the top of the area without striking anything, it remains there, oscillating slightly, for the duration.

At the end of the duration, affected objects and creatures fall back down.

## KINETIC CONTROL

*1st-level mythic abjuration*

**Casting Time:** 1 action

**Range:** Self

**Components:** V, S, M (a dry sponge)

**Duration:** Concentration, up to 1 minute

You create a magical barrier around yourself that absorbs kinetic energy. The barrier can absorb up to 100 points of damage, storing it within you for later use. The damage it absorbs can only be bludgeoning, force, piercing, or slashing damage. The spell ends early if it absorbs the maximum amount of damage it can.

**Benign Discharge.** For the duration of the spell, you can use an action to discharge the kinetic energy you have stored within you, targeting a creature or object within 5 feet of you. The target takes force damage equal to the damage your kinetic barrier has absorbed. The spell then ends.

**Malign Discharge.** If the spell ends before you discharge the stored kinetic energy, you take force damage equal to the damage your kinetic barrier has absorbed and become stunned until the end of your next turn.

**At Higher Levels.** When you cast this spell using a mythic spell slot of 2nd level or higher, the spell can absorb an additional 50 points of damage for each mythic spell slot above 1st.

## LIVING LIGHTNING

*1st-level mythic evocation*

**Casting Time:** 1 action

**Range:** 60 feet

**Components:** V, S, M (a small silver rod)

**Duration:** Concentration, up to 1 minute

You create a bolt of lightning that arcs toward a target of your choice that you can see within range. The target must make a Dexterity saving throw. The target takes 10d8 lightning damage on a failed save, or half as much damage on a successful one. As the lightning crackles around the target, the lightning forms into a living entity; a reflection of your will in the form of pure electrical energy.

**Statistics.** The living lightning has the statistics of an air elemental but none of its actions. It also can't move. The living lightning is friendly to you and your companions for the duration. Roll initiative for the living lightning, which has its own turns. It doesn't obey your commands but is anchored to your emotions.

A creature that starts its turn in the living lightning's space takes 10d8 lightning damage. A creature that hits the living lightning with a melee weapon attack while within 5 feet of it, takes 5d8 lightning damage.

**Lightning Spawn.** The living lightning can use its action only to cast the *living lightning* mythic spell, potentially creating more of its kind. The save DC of this casting of living lightning is the same as if you would cast it yourself.

**At Higher Levels.** When you cast this spell using a mythic spell slot of 2nd level, all lightning damage increases to d10s, and when you cast this spell using a mythic spell slot of 3rd level, all lightning damage increases to d12s.

## NAIL TO THE SKY

1st-level mythic transmutation

**Casting Time:** 1 action

**Range:** 30 feet

**Components:** S

**Duration:** Instantaneous

You target a Huge or smaller creature within range, flicking your finger upwards. The target must make a Dexterity saving throw to grab onto a fixed object it can reach, or be hurled straight upwards into orbit. While in orbit, a creature begins to suffocate and can't move unless it has a flying speed.

If this spell is cast on a plane that doesn't have an orbit, the target is instead hurled 5 miles straight upwards. If some solid object (such as a ceiling) is encountered while the creature is flung upwards, the target takes falling damage equal to the length it was hurled. It then falls back down unless it has means to stay aloft.

## NIGHTMARE LORD

2nd-level mythic conjuration

**Casting Time:** 1 action

**Range:** Self

**Components:** V, S

**Duration:** Up to 1 minute

You contact a creature of pure nightmare, allowing it to use you as a means to enter the world. You disappear and a **dream larva** appears in your space. Roll initiative for the dream larva, which has its own turns. The dream larva is not friendly to your allies and acts in accordance with its

own will. More often than not, dream larvae simply seek to spread as much malice as they can.

For the duration of the spell, you are incapacitated and at the start of each of your turns, you take 4d8 psychic damage as you float aimlessly in the dream larva's aberrant home world, witnessing cruel nightmares not meant for mortal eyes.

If the dream larva is reduced to 0 hit points, it disappears back to whence it came and you reappear prone in its space. The spell then ends.

## ODEON'S QUINTESSENTIAL ARMOR

1st-level mythic abjuration

**Casting Time:** 1 action

**Range:** Self

**Components:** S, M (a fresh piece of brain from an intellect devourer which the spell consumes)

**Duration:** 1 minute

You squint your eyes as psychic energies envelop you. You gain 50 temporary hit points for the duration. If a creature hits you with a melee attack while you have these hit points, the creature must make a Wisdom saving throw. On a failed save, the attacker takes 50 psychic damage and becomes unable to breathe until it receives magical healing. On a successful save, the attacker takes half the damage and doesn't become unable to breathe.

**At Higher Levels.** When you cast this spell using a mythic spell slot of 2nd level or higher, both the temporary hit points and the psychic damage increase by 50 for each mythic spell slot above 1st.

At will: *haste*, *prismatic spray*, *weird*

**Magic Weapons.** The larva's weapon attacks are magical.

**Magic Resistance.** The larva has advantage on saving throws against spells and other magical effects.

**Nightmare Form.** The larva's true form is an intangible mass of nightmare stuff, but the larva is perceived in the form of what-

ever a creature finds most fearsome or horrible in the world. A creature that starts its turn within 30 feet of the larva and can see the larva must make a DC 23 Wisdom saving throw. On a failed save, the creature is frightened for 1 minute. At the end of each of the frightened creature's turns, it must succeed on a Wisdom saving throw or take 4d10 psychic damage. On a successful save, the creature is no longer frightened and is immune to the larva's Nightmare Form for the next 24 hours.

**Tongue of Darkness.** The larva can't speak, but any creature that can understand a language can understand the larva's telepathy. In addition, the larva understands all spoken languages.

## ACTIONS

**Multiattack.** The larva makes one bite attack and four claw attacks. Alternatively, it makes two attacks with its Nightmare Blast.

**Bite. Melee Weapon Attack:** +15 to hit, reach 5 ft., one creature. **Hit:** 29 (4d10 + 7) piercing damage. If the target is a creature, it must make a DC 23 Wisdom saving throw, or fall into a catatonic state for 1 minute where it is assaulted by mind-wrecking nightmares. While in this catatonic state, a creature is unconscious and takes 18 (4d8) psychic damage at the start of each of its turns. The creature wakes up only if another creature takes an action to shake it awake.

**Claw. Melee Weapon Attack:** +15 to hit, reach 5 ft., one target. **Hit:** 25 (4d8 + 7) piercing damage plus 18 (4d8) psychic damage.

**Nightmare Blast. Ranged Spell Attack:** +15 to hit, range 120 ft., one creature. **Hit:** 33 (4d12 + 7) psychic damage and the target must make a DC 23 Wisdom saving throw, or fall into a catatonic state for 1 minute where it is assaulted by mind-wrecking nightmares. While in this catatonic state, a creature is unconscious and takes 18 (4d8) psychic damage at the start of each of its turns. The creature wakes up only if another creature takes an action to shake it awake.

## NOVA OF FORCE

*2nd-level mythic evocation*

**Casting Time:** 1 action

**Range:** Special

**Components:** V, S

**Duration:** Instantaneous

A massive nova of force bursts outwards from you and through all creatures, objects, structures within 1 mile. The nova can move around a creation of magical force, such as the wall created by the *wall of force* spell, but it can't move through it. A creature within range takes 1d10 force damage. If a creature is Large or smaller, it is also knocked prone.

## NOVA OF SOOTHING

*3rd-level mythic evocation*

**Casting Time:** 1 action

**Range:** Special

**Components:** V, S

**Duration:** Instantaneous

A massive nova of positive energy washes outwards from you and through all creatures within 1 mile. An affected creature regains hit points equal to half its hit point maximum. The spell also ends blindness, deafness, one level of exhaustion, and any diseases affecting the target. This spell has no effect on constructs or undead.

## PERIPETY

*1st-level mythic abjuration*

**Casting Time:** 1 action

**Range:** Touch

**Components:** V, S

**Duration:** 1 minute

You create a field of abjuration magic around the target. For the duration, when the target is hit by a ranged attack, the attack instead misses the target and is instead reflected back at the attacker unless the attacker is a deity.

Once three attacks have been forced to miss in this manner, the spell ends.

**At Higher Levels.** When you cast this spell using a mythic spell slot of 2nd level or higher, the spell can force two additional attacks to miss for each mythic spell slot above 1st.

## PESTILENCE

*3rd-level mythic necromancy*

**Casting Time:** 1 minute

**Range:** 1 mile

**Components:** V, S

**Duration:** Instantaneous

A wave of illness washes through the air inside a 1,000-foot cube within range. Each creature within the area must make a Constitution saving throw against disease or be infected with slimy doom for 30 days. The disease is not contagious.

Since this spell induces a natural disease in its target, any effect that removes a disease or otherwise ameliorates a disease's effects apply to it.

A creature infected with slimy doom begins to bleed uncontrollably. The creature has disadvantage on Constitution checks and Constitution saving throws. In addition, whenever the creature takes damage, it is stunned until the end of its next turn.

The area in which the disease was released begins to reek of rot and decay, and nonmagical plants in the area wither and die over the next 24 hours.

## PURGE MAGIC

*1st-level mythic abjuration*

**Casting Time:** 1 action

**Range:** 120 feet

**Components:** V, S

**Duration:** Instantaneous

You create a 15-foot-radius sphere centered on a point you choose within range. All spells of 1st mythic level or lower within the area immediately end.

**At Higher Levels.** When you cast this spell using a mythic spell slot of 2nd level, it also ends mythic spells of 2nd level, and when you cast this spell using a mythic spell slot of 3rd level, it also ends mythic spells of 3rd level or lower.

## RAISE ISLAND

*2nd-level mythic transmutation*

**Casting Time:** 1 hour

**Range:** Touch

**Components:** V, S

**Duration:** Instantaneous

While touching a body of water, you cause an island raise out of the water beneath your hand. The island can be sandy or rocky, as determined by the DM, but it is a barren protrusion that is stable and remains in place permanently. The island's size is 10 x 1d20 feet north to south and 10 x 1d20 east to west.

This spell can form an isthmus between two landmasses by continually raising new islands in connection with each other, in which case they will form to connect naturally.

An island created in this manner can sink back into the sea if targeted by an earthquake spell or similar effect, at the DM's discretion.

## REPULSION

*2nd-level mythic abjuration*

**Casting Time:** 1 action

**Range:** Self

**Components:** V, S

**Duration:** Concentration, up to 1 hour

Choose a type of creature when you cast this spell other than your own type. For example, you could choose fey, giants, or undead. A shimmering barrier extends out from you in a 10-foot radius and moves with you, remaining centered on you and hedging out creatures of the type you chose. The barrier lasts for the duration.

The barrier prevents an affected creature from passing or reaching through. An affected creature also can't cast spells or make attacks with ranged or reach weapons through the barrier.

If you move so that an affected creature is forced to pass through the barrier, the spell ends.

Deities are unaffected by the spell.

## RIFT

*3rd-level mythic evocation*

**Casting Time:** 1 hour

**Range:** Sight

**Components:** V, S, M (a hoard of black gemstones worth at least 50,000 gp which the spell consumes)

**Duration:** 1 minute

You magically force open a rift in reality, creating a gateway from the Far Realm. The rift is a 100-foot radius sphere of magical darkness. From the rift appear multiple, massive tentacles. Anything in the sphere's space is pulled into the Far Realm.

Each creature within 1 mile of the rift that isn't in total cover must succeed a Strength saving throw or be magically moved 50 feet closer to it. Creatures within 100 feet of the rift have disadvantage on the saving throw. All objects within 1 mile of the rift that aren't being worn or carried, regardless of their size, are sucked into the Far Realm.

A creature or object that is pulled into the Far Realm can only be brought back with a *wish* spell.

The casting of the spell is visible as far as 5 miles away.

## RUIN

*3rd-level mythic evocation*

**Casting Time:** 1 action

**Range:** 120 feet

**Components:** V, S, M (an amethyst, a diamond, an emerald, a ruby, a sapphire, and a topaz, each worth at least 1,500 gp which the spell consumes)

**Duration:** Instantaneous

You target a creature within range, causing its body to tear itself apart at a molecular level. The target must make a Strength, Dexterity, Constitution, Intelligence, Wisdom, and Charisma saving throw. For each failed save, the target takes 20d10 force damage. If this damage reduces a creature to below 100 hit points, it is annihilated and can only be resurrected with a *true resurrection* or *wish* spell.

Constructs and oozes have disadvantage on all saving throws.

## SEYSER'S GREATEST TRICK

*1st-level mythic enchantment*

**Casting Time:** 1 action

**Range:** Self

**Components:** V, S

**Duration:** Concentration, up to 1 hour

Each creature within 120 feet of you that can see you must make a Wisdom saving throw. On a failed save, for the duration of the spell a creature forgets that you exist and you become invisible to it. The effect ends for a creature, if you target it with an attack or a spell, or if you deal damage to it.

**At Higher Levels.** When you cast this spell using a mythic spell slot of 2nd level, the duration increases to Concentration, up to 8 hours. When you cast this spell using a mythic spell slot of 3rd level, the duration increases to Concentration, up to 24 hours.

## SOUL DOMINION

*3rd-level mythic enchantment*

**Casting Time:** 1 action

**Range:** Special

**Components:** V, S

**Duration:** Concentration, up to 1 hour

Choose a creature known to you as the target of this spell. The target must be on the same plane of existence as you and it can't have a CR or level higher than yours. You attempt to magically beguile the creature. It must succeed on a Wisdom saving throw or be charmed by you for the duration.

While the creature is charmed, you have a telepathic link with it as long as the two of you are on the same plane of existence. You can use this telepathic link to issue commands to the creature while you are conscious (no action required), which it does its best to obey. You can specify a simple and general course of action, such as "Attack that creature," "Run over there," or "Fetch that object." If the creature completes the order and doesn't receive further direction from you, it defends and preserves itself to the best of its ability.

You can use your action to take total and precise control of the target. Until the end of your next turn, the creature takes only the actions you choose, and doesn't do anything that you don't allow it to do. During this time, you can also cause the creature to use a reaction, but this requires you to use your own reaction as well.

Each time the target takes damage, it can make a new Wisdom saving throw against the spell. If the saving throw succeeds, the spell ends.

## SOUL SCRY

*1st-level mythic divination*

**Casting Time:** 1 action

**Range:** Special

**Components:** V, S, M (A focus worth at least 10,000 gp, such as a crystal ball, a silver mirror, or a font filled with holy water)

**Duration:** Concentration, up to 1 hour

Choose a creature known to you as the target of this spell. The target must be on the same plane of existence as you and it can't have a CR or level higher than yours. The target must make a Wisdom saving throw. On a failed save, you can use your action to see through the target's eyes and hear what it hears, and continue to do so until you use your action to return to your normal senses.

While perceiving through the target's senses, you gain the benefits of any special senses possessed by the target, though you are blinded and deafened to your own surroundings.

## SPELL SPARK

*1st-level mythic abjuration*

**Casting Time:** 1 action

**Range:** Self

**Components:** V, S

**Duration:** 1 hour

You create an invisible spark that takes hold within you. For the duration, the next time you become the target of a 9th level spell or lower, the spell has no effect on you as it is absorbed by the spark within you. This spell then ends.

**At Higher Levels.** When you cast this spell using a mythic spell slot of 2nd level, it also absorbs the effects of mythic spells of 1st level, and when you cast this spell using a mythic spell slot of 3rd level, it also absorbs mythic spells of 2nd level or lower.

## SPELL WORM

*1st-level mythic enchantment*

**Casting Time:** 1 action

**Range:** 60 feet

**Components:** V, S

**Duration:** Concentration, up to 1 minute

You target a creature within range. The target must succeed a Wisdom saving throw. On a failed save, the target is infected by a spell worm; an intangible, mental construct within its mind. While affected, the target loses its highest level spell slot at the start of each of its turns, unless it spends uses its action mentally combating the worm and thus ending the spell.

## SURGE OF REJUVENATION

*3rd-level mythic evocation*

**Casting Time:** 1 action

**Range:** 30 feet

**Components:** V, S

**Duration:** Instantaneous

Choose a creature that you can see within range. A massive surge of positive energy washes through the creature, causing it to return to its hit point maximum. The spell also ends blindness, deafness, all exhaustion, and any diseases or poisons affecting the target. This spell has no effect on constructs or undead.

## SURGE OF SOOTHING

*2nd-level mythic evocation*

**Casting Time:** 1 action

**Range:** 60 feet

**Components:** V, S

**Duration:** Instantaneous

Choose a creature that you can see within range. A massive surge of positive energy washes through the creature, causing it to regain hit points equal to half its hit point maximum. The spell also ends blindness, deafness, one level of exhaustion, and any diseases affecting the target. This spell has no effect on constructs or undead.

## TENSER'S FLOATING PRISON

*1st-level mythic abjuration*

**Casting Time:** 1 action

**Range:** 20 feet

**Components:** V, S, M (a drop of mercury and ruby dust worth 5,000 gp which the spell consumes)

**Duration:** 1 hour

An invisible, cube-shaped prison composed of magical force springs into existence around an area you choose within range.

The prison can be up to 10 feet on a side, creating a solid barrier that prevents any matter from passing through it and blocking any spells cast into or out of the area.

When you cast the spell, any creature that is completely inside the cage's area is trapped. Creatures only partially within the area, or those too large to fit inside the area, are pushed away from the center of the area until they are completely outside the area.

A creature inside the cage can't leave it by nonmagical means. If the creature tries to use teleportation or interplanar travel to leave the cage, it must first make a Charisma saving throw. On a success, the creature can use that magic to exit the cage. On a failure, the creature can't exit the cage and wastes the use of the spell or effect. The cage also extends into the Ethereal Plane, blocking ethereal travel.

After creation, the prison begins to hover 3 feet above the ground. It is immobile while you are within 20 feet of it. If you move more than 20 feet away from it, the prison follows you so that it remains within 20 feet of you. It can move across uneven terrain, up or down stairs, slopes and the like, but it can't cross an elevation change of 10 feet or more. For example, the disk can't move across a 10-foot-deep pit, nor could it leave such a pit if it was created at the bottom.

If you move more than 100 feet from the prison (typically because it can't move around an obstacle to follow you), the spell ends.

This spell can't be dispelled by *Dispel Magic* or *Purge Magic*.

## TRANSPORT AREA

*1st-level mythic conjuration*

**Casting Time:** 8 hours

**Range:** Sight

**Components:** V, S

**Duration:** Instantaneous

You target an area that you can see, attempting to transport it to another area within the same plane of existence. The targeted area is a 30-foot tall, 30-foot radius cylinder. For each additional hour you spend on casting the spell beyond 8 hours, you can increase the radius or the height of the cylinder by 30 feet. When you complete the spell, the area is transported to a location that you know within the same plane of existence. Creatures, objects, and structures in the area are transported with it.

When the landmass appears at its destination, any creature that occupies a space in the area is ejected to the nearest unoccupied space.

## ULTIMATE WISH

*3rd-level mythic conjuration*

**Casting Time:** 1 action

**Range:** Sight

**Components:** V, S

**Duration:** Instantaneous

Ultimate wish is the mightiest spell a creature can cast. By simply speaking aloud, you can alter the very foundations of reality in accord with your desires. The basic use of this spell is to duplicate any other spell of 1st or 2nd mythic level, or a 9th level spell or lower as if cast with a 12th level spell slot. You don't need to meet any requirements in that spell, including costly components. The spell simply takes effect.

Alternatively, you can create one of the following effects of your choice:

- You create one object of up to 100,000 gp in value that isn't a magic item. The object can be no more than 1,000 feet in any dimension, and it appears in an unoccupied space you can see on the ground.
- You allow any number of creatures that you can see to regain all hit points, and you end all effects on them described in the greater restoration spell.
- You grant up to ten creatures the benefits of a long rest.
- You grant up to ten creatures you can see immunity to one spell school for 8 hours. For instance, you could make yourself and all your companions immune to evocation magic.
- You can turn back time by 1 minute.

You might be able to achieve something beyond the scope of the above examples. State your wish to the GM as precisely as possible. The GM has great latitude in ruling what occurs in such an instance; the greater the wish, the greater the likelihood that something goes wrong, just as with a 9th level wish spell. However, if you are not satisfied with the outcome of your wish, you can decide to unmake the effect but must do so immediately.

If you cast this spell to produce any effect other than duplicating another spell, you can't cast ultimate wish again for 30 days. In addition, there is a 33 percent chance that you permanently lose one 3rd-level mythic spell slot.

## VERDIGRIS TSUNAMI

*1st-level mythic conjuration*

**Casting Time:** 1 minute

**Range:** Sight

**Components:** V, S

**Duration:** Concentration, up to 1 minute

A wall of leaves, roots, and vines springs into existence at a point you choose within range. You can make the wall up to 500 feet long, 500 feet high, and 50 feet thick. The wall lasts for the duration.

When the wall appears, each creature within its area must make a Strength saving throw. On a failed save, a creature takes 10d10 bludgeoning damage, or half as much damage on a successful save. If the creature is Huge or smaller, it is trapped inside the wall.

At the start of each of your turns after the wall appears, the wall, along with any creatures in it, moves 50 feet away from you. Any Huge or smaller creature inside the wall or whose space the wall enters when it moves must succeed on a Strength saving throw or take 9d10 bludgeoning damage. A creature can take this damage only once per round. At the end of the turn, the wall's height is reduced by 50

feet, and the damage creatures take from the spell on subsequent rounds is reduced by 1d10. When the wall reaches 0 feet in height, the spell ends.

A creature caught in the wall is grappled by it, but can move 5 feet within the wall with a successful Strength (Athletics) or Dexterity (Acrobatics) check against your spell save DC. If it fails the check, it can't move. A creature that moves out of the area falls to the ground.

## VENGEFUL GAZE

*1st-level mythic transmutation*

**Casting Time:** 1 action

**Range:** Sight

**Components:** V, S

**Duration:** Instantaneous

You target a creature that you can see, attempting to smite it with divine retribution. The target must make a Wisdom saving throw. On a failed save, the target takes 10d10 + 100 radiant damage. If this damage reduces the target to 0 hit points, it is disintegrated.

A disintegrated creature and everything it is wearing and carrying, except magic items, are reduced to a pile of fine gray dust. The creature can be restored to life only by means of a *true resurrection* or a *wish* spell.

Deities automatically succeed on the saving throw.

**At Higher Levels.** When you cast this spell using a mythic spell slot of 2nd level or higher, the spell's damage increases by 5d10 + 50 for each mythic spell slot above 1st.

## WINGRAVE'S VINDICTIVE VORTEX

*3rd-level mythic evocation*

**Casting Time:** 1 action

**Range:** Self

**Components:** V, S, M (a piece of straw and a toothpick)

**Duration:** Concentration, up to 1 minute

A massive whirlwind, filled with thousands of tiny blades of magical force, begins to howl all around you. The whirlwind is a 20-foot-radius, 60-foot-high cylinder with a 10-foot-radius hollow center centered on you. Until the spell ends, the whirlwind moves with you, centered on you. The whirlwind sucks up any Medium or smaller objects that aren't secured to anything and that aren't worn or carried by anyone.

A creature must make a Dexterity saving throw the first time on a turn that it enters the whirlwind or that the whirlwind enters its space, including when the whirlwind first appears. A creature takes 10d10 bludgeoning damage and 10d10 force damage on a failed save, or half as much damage on a successful one. In addition, a Large or smaller creature that fails the save must succeed on a Strength saving throw or become restrained in the whirlwind until the spell ends. When a creature starts its turn restrained by the whirlwind, the creature is pulled 10 feet higher inside it, unless the creature is at the top. A restrained creature moves with the whirlwind and falls when the spell ends, unless the creature has some means to stay aloft.

A restrained creature can use an action to make a Strength or Dexterity check against your spell save DC. If successful, the creature is no longer restrained by the whirlwind and is hurled 6d6 × 10 feet away from it in a random direction.

The whirlwind imposes disadvantage on ranged weapon attack rolls out of or into the it. The whirlwind also extinguishes open flames, and disperses fog.

A creature that can fly by magical means that is caught in the whirlwind automatically succeeds its Strength or Dexterity check to escape the whirlwind, but is then hurled away as any other creature.

# LEGENDS ARE BORN HERE

---

To us roleplaying is all about escaping every day life. But it's not just an escape to anywhere; it's a magical journey to mystical places together with friends. It's a way to play a socially challenged brute or a young girl meddling with powers she doesn't quite understand. It's about collective experiences, having adventures together, and, most importantly, having fun.

Sometimes, however, that fun must come to an end. When a campaign is finished, then Thokk the barbarian or Seyser the Bard stop existing. Of course that might result in the birth of Odeon the warlock and completely new adventures, which is part of the awesomeness to begin with!

That said, sometimes you just fall in love with your character, the yearning for more journeys with this fantastic persona, now a part of you, making you wish their adventuring career wouldn't need to be retired. And now, by expending just a single 9th-level spell slot, this book makes just that possible.

**EPIC LEVELS.** Ten more levels for every class, including artificer and blood hunter, allows you to reach 30th level with your favorite character. Each class is given extreme care and attention, ensuring a meaningful progression where each class and subclass retains its unique style and flavor. We have amassed immensely helpful feedback from the community since this title first saw the light of day, allowing **EPIC CHARACTERS** to evolve over time.

**NEW RULES.** The book provides new rules for core mechanics such as cantrip progression past 20th level, as well as an optional rule designed to make epic level combat feel more engaging and rewarding.

**MYTHIC PROGRESSION.** Also included is an additional progression system that allows for continued play past 30th level, introducing mythic spells that enable you to rival the gods themselves.
